Australia's first fully recyclable
mattress collection

A.H. BEARD ORIGINS

Handmade to order by Australia's master sleepsmith

A.H.BEARD® Origins Catalogue 2021

A.H. Beard Origins is the latest in a long list of sleep innovations dating back to 1899. Handmade to order in Australia, your A.H. Beard Origins mattress is a superb expression of the sleepsmith's craft and a wise investment in your wellbeing.

Our passion for giving people the best sleep of their lives has been keeping us awake at night since 1899.

But recently, something else has been disturbing our dreams.

The one million mattresses every year that end their lives in Australian landfill.

As a business committed to circular sustainability, we're a driving force behind mattress recycling in Australia.

And as the nation's leading independent manufacturer, we couldn't rest until we'd created Australia's first fully recyclable mattresses.

Mattresses made with locally sourced wool fibres, fabrics woven from sustainably grown eucalyptus, and the world's first 100% recyclable pocket spring support system.

Beds, handmade to order in Australia, that will go on to live other useful lives, long after they've given you the best sleep of your life.

There's green. And there's green tag.

It takes more than just 'being green' to earn Global Green Tag Platinum certification. One of the world's most demanding, trusted and widely recognised ecolabels, it was awarded to the A.H. Beard Origins range of mattresses.

Find us at:
www.globalgreentag.com

A range we're now proud to call A.H. Beard Origins.

Made to make tomorrow better

A.H.BEARD® Origins Catalogue 2021

4

MICRO COMFORT COILS

Every component in an A.H. Beard Origins mattress is chosen for its sleep-enhancing qualities, the sustainability of its source and its end-of-life recyclability.

EvoCoil®

Found in our Prosperity range, EvoCoil is the world's first 100% recyclable pocket spring support system. It is ultrasonically welded rather than glued, so the non-woven fabric pockets and steel springs can be separated for recycling at end of life.

Comfort Coils

A.H. Beard Origins mattresses (from Planet Q1 upwards) contain up to 9,000 of these recyclable comfort coils, which conform to your body and ease pressure on your hips, back and shoulders as you sleep.

QuadCore™

A recyclable support system in which each wire spring is individually wrapped in its own fabric pocket. This design means each spring can move independently of those around it, protecting you from partner disturbance.

QUADCORE™

EVOCOIL®

Australian wool

The wools sourced for Origins mattresses come from Australian farms such as Cloven Hills in Victoria, where sheep are farmed to the highest environmental and ethical standards. When it's finished keeping you comfortable, the wools in Origins mattresses can be turned into protective padding blankets or roofing insulation.

Tencel® & organic cotton

Soft, breathable fabric made from a blend of Tencel® and organic cotton is responsibly milled in Australia. Renowned for its softness, Tencel® is made from the fibres of sustainably grown eucalypts. Tencel® naturally wicks heat and moisture away from the body to keep you sleeping comfortably. It is naturally antimicrobial and biodegradable.

Organic cotton has a lower carbon footprint, using less fuel, water and energy to produce. Its natural antimicrobial qualities also make it perfect for a healthy sleep environment.

Supporting Australian jobs and communities

A wonderful night's sleep isn't the only benefit of your Origins mattress. Craftsman-made in Australia using locally preferred materials and components, your Origins mattress will also support our growers and create jobs and wealth in our communities.

The 6 essential features for premium sleep

FOUND IN EVERY A.H. BEARD ORIGINS MATTRESS

What should you look for when investing in a mattress?

As bedmakers with over a century of experience, we believe it comes down to these six essentials, which create the ideal conditions for healthy, restorative sleep. You'll find all six in every A.H. Beard Origins mattress.

1. It just feels right

A blend of super soft Tencel® and organic cotton is bound to a deep layer of Australian wool with hand tufting that runs the full depth of the mattress. It creates a luxurious first impression that is repeated every time you go to bed.

2. All-over comfort

As you recline, sumptuous wool fibres and Comfort Coils* gently conform to your body's curves, helping to relieve pressure, prevent discomfort and keep you relaxed from dusk till dawn.

3. All-night support

While you sleep, every spring works independently to support your spine, creating the perfect posture for your body to rest, recover and rejuvenate.

4. A healthy sleep environment

The hypoallergenic and antimicrobial qualities of the naturally sourced fabrics and fibres create a healthy sleep environment. The Ultrashield treatment provides extra protection from mould, bacteria and dust mites.

5. Don't be disturbed

The comfort layers and independently supporting coils absorb the movements of others sharing your bed, helping reduce partner disturbance.

6. Temperature regulating

To keep you comfortable on warm nights, our craftsmen selected components to encourage the flow of air and help disperse heat. Fabrics and wool fibres were chosen for their natural wicking properties that draw heat and moisture from the skin.

*Comfort Coils are featured in models from Planet Q1 and above

Smart thinking while you sleep

Not sure how much sleep you're getting? Monitor, track and analyse your sleep patterns with our innovative Smart Sleep Solutions tracking devices.

Adjust your comfort

An adjustable bed features parts that can be raised or lowered independently for optimum comfort. For example, if you want to raise your legs to ease lower back pain, the lower section of the bed can be raised. Or if you want to sit up straight to read a book, you can choose to raise the top section while leaving the lower section flat.
